

# Our Computer Heritage

## **Acknowledgements.**

*Our Computer Heritage* was launched by the Computer Conservation Society (CCS) in 2003. Many volunteers, most of whom are members of the CCS, have researched the technical information. Their names are given below.

The project includes information and illustrations culled from manuals and brochures originally published by Elliott Brothers (London) Ltd., Ferranti Ltd., EMI Ltd., English Electric Ltd., Leo Computers Ltd., British Tabulating Machine Co. Ltd., International Computers & Tabulators Ltd. and ICL. We are grateful to the successors of these companies (principally Fujitsu Ltd., BAE Systems and Telent plc) for permission to use the material

We acknowledge the help given by various museums and archives, especially the following:

The LEO Society;  
The National Archive for the History of Computing;  
The National Museum of Science and Industry group, which includes the Science Museum in London and Wroughton and the Museum of Science and Industry in Manchester (MOSI);  
The National Museums of Scotland;  
The National Museum of Computing at Bletchley Park;  
Science & Technology Facilities Council, Rutherford Appleton Laboratory;  
Computer Laboratory, University of Cambridge;  
School of Computer Science, University of Manchester.

The following volunteers have contributed in various ways to the project since 2003:

Rod Brown	Toby Howard
John Buckle	Roger Johnson
Chris Burton	Michael Knight
Peter Byford	Frank Land
Hamish Carmichael	Simon Lavington
Dai Edwards	Tony Morgan
Bill Findlay	Peter Niblett
Eric Foxley	Richard Overill
Terry Froggatt	Virgilio Pasquali
Nigel Furness	David Pentecost
John Gosling	Frank Taylor
Phil Gregg	Alan Thomson
David Holdsworth	Brian Wichmann
Bob Hopgood	Martin Wright
